Academic Projects

Threat Reporting System (NodeJS, MongoDB, Angular, Webpack, Babel, HTML5, CSS3) (<https://trs-cpsc597.herokuapp.com/>)

- Developed a single page web application to report threat online on just one button click.
- This web application tracks victim's current location and notifies to nearby police department.
- The police department can use this web app to identify more threat prone areas and can increase patrolling in that area.

Conjoint (NodeJS, MongoDB, Handlebars, JavaScript, HTML5, CSS3) (<https://conjointreview.herokuapp.com/>)

- Developed a single page Review sharing web application to help tourists and people who are new in city.
- This app is Yelp API based site which helps users to read/write reviews about local grocery stores, night life and Active life.
- This site can be very useful for tourists in deciding whether the place they wanted to visit is worth going or not.

Delicious (NodeJS, Express, MongoDB, Socket.io) (<https://delicious-food.herokuapp.com/>)

- Designed and developed a real-time web application for users to post and share pictures of the food they eat with friends.
- Integrated chat application to help people of same interest and going same place to get socialized.

Message Board (Asp.net core, Angular)

- Designed and developed Angular and ASP.net core messaging board app with Authentication.
- Created backend API in ASP.net core and developed all the frontend UI part using Angular.

Naming Contest (NodeJS, React JS, babel, JSX)

- Developed a web application to create naming contests and have users propose new name for every contest.
- Used MongoDB as database and Node as API server and web server and used React on front end to consume API data.

My Blog (NodeJS, Express, MongoDB, Angular 4)

- Developed a full stack blog application covering major concepts of Angular4. Node JS, Angular 4, Mongo DB, Express JS.
